

ThreeSixty VoIP

Move towards Unified Communications whilst reducing your PBX costs

Over the past few years we have witnessed a robust movement towards replacing traditional connections between the enterprise and the telephony network with Voice over IP or VoIP. VoIP allows multi-line phone systems used by businesses to aggregate multiple calls, screen shares or videoconferences over an IP connection. Beyond delivering the cost savings expected from replacing older functions with less expensive technologies, VoIP opens up vast new capabilities across multiple locations, opening the way for true Unified Communications.

Welltel VoIP is suitable for any size of business that currently has a PBX, unified communications solution or key system. Companies can benefit from multi-site rationalisation to reduce the number of ISDN connections required, increase resilience via the automatic failover capability, and reduce costs associated with calls and line-rental. Welltel VoIP is tested and approved to interoperate with systems and PBXs from NEC, Avaya, Shoretel, 3com, Samsung, Aastra, Linksys, Cisco, Asterisk, Panasonic and many other leading phone system providers

"The Welltel VoIP service helped Adroll to have a presence in Europe by installing their SBC device with local landline numbers for each country. We have definitely made considerable cost savings too!" - Sam Kinsella, IT Manager EMEA - Adroll

Line & PBX rationalisation with enhanced system resilience

Save your business thousands per year in call & line rental costs

What is the cost? To find out within 24 hours an exact cost of your Phone System, please email sales@welltel.ie or call +353 1 254 1800

CHALLENGES

- Existing ISDN call rate and line rental costs are way too high
- Cant find a call bundle suitable for my business
- Wasting too much time & effort managing several PBXs across multiple sites
- Moving office location but unable to retain some phone numbers
- Worried about business continuity capability of existing phone system
- No possibility to effectively load-balance calls during peak hours

Welltel ThreeSixty VoIP	Benefits
<p>Multi-site rationalisation Reduce the number of ISDN connections required</p>	<p>Tremendous savings on maintenance time and costs for all your PBXs. Free Irish landline numbers. Significant cost savings compared to ISDN / FRI lines</p>
<p>Disaster recovery for business</p>	<p>Guaranteed business continuity due to enhanced resilience. Instantly distribute calls to another site or to homeworkers if your main site goes down.</p>
<p>Flexibility with phone numbers</p>	<p>Keep the same geographic number when moving locations, thus avoiding high costs associated with call forwarding or with producing new company stationary</p>
<p>Selection of call plans available, customisable for larger volumes or specific requirements</p>	<p>Choose the call plan most appropriate to your requirements, resulting in cost savings of up to 70% compared to other VoIP providers</p>
<p>Integration tested and approved to interoperate with a number of leading PBX system providers</p>	<p>Easy, fast implementation - rapidly set up new phone numbers</p>
